Below the header, the page title 'About Us' is displayed. The main content area begins with the section header 'About Asia Pacific Regional Internet Governance Forum (APrIGF)'. The text below explains that Asia has the strongest growing demand for Internet addresses, contrasting it with North America and Europe. It states that the APrIGF serves as a platform for discussion, exchange, and collaboration at a regional level. The text also mentions that in 2010, while the global IGF is in its fifth and final year, Regional IGFs have been established in many other regions, and that the APrIGF is being convened to raise awareness and encourage participation from relevant stakeholders. Finally, it notes that the multi-stakeholder approach is a core principle of the APrIGF, emphasizing the diversity of participants and the openness of the discussion.
